MAKING CUSTOM LCD SOLUTIONS EASY

EXPERTS IN LCD APPLICATION AND DESIGN

RAPID PROTOTYPES - QUICK TURN TIMES

ITAR REGISTERED U.S. MANUFACTURING FACILITY

WIDE RANGE OF LCD TECHNOLOGIES

- TN
- STN
- FSTN
- HTN
- Color STN
- Heilmeyer
- Dichroic

TYPICAL MARKET APPLICATIONS

- Aerospace
- Industrial Controls
- Medical
- Transportation
- Communications
- Military
- Infrastructure
- Agriculture

COMPLETE USER INTERFACE CAPABILITIES

Custom Backlights - LED, E/L, CCFL

Display Controllers - Chip on Glass (COG),

Chip on Board (COB), TAB

Custom Touch Screens - Resistive, Capacitive, SAW

Extended Temperature Ranges & Integrated Heaters

Night Vision (NV) Compatibility

DOMESTIC AND GLOBAL MANUFACTURING AND SUPPORT

DCI has been designing and manufacturing custom LCDs in the United States for over twenty years. Our proven design team has decades of experience creating innovative display solutions at our facility just outside Kansas City.

We can rapidly produce LCD prototypes for new products and also manufacture production volume displays in our state-of-the-art clean room, one of the only LCD manufacturing facilities in North America. Registered with the Directorate of Defense Trade Controls by the U.S. Department of State, DCI produces highly reliable ITAR restricted displays and assemblies for demanding military applications in our own U.S. facility.

For cost competitive, high-volume applications, we can seamlessly transition production to one of our certified global manufacturing partners. We have worked with select manufacturing partners for many years, in countries from Asia to Europe, and will select the partner whose strengths match your specific requirements.

We work in partnership with your product designers to fully understand your requirements and deliver custom display solutions that distinguish your products from the competition. With the complete electronic design and manufacturing capabilities located in our factory, we can provide you with a completely integrated, custom display solution.
